

## The Pilot

The goal of this initiative was to provide tangible results with a Har Nebo pilot program designed to provide a viable scalable and adaptable plan that will inspire others to restore these sacred places to a respectful appearance level for generations to come.

### Focuses on professional historical conservation:

- **Leveling the ground**, removing overgrowth, lifting and cleaning stones and returning them to a reinforced solid level base.
- **Repairing a section of up to ~20 headstones**, chosen for their close proximity and easy access for equipment based on the budget.
- **Delivering with a cemetery conservation professional** and we will be seeking local apprentices to train with him.
- **All workers entering the site will provide certificates of insurance** and others will sign waivers.
